Software Development Portfolio

Movie Website | | <https://github.com/haleynrosi/Movie-Site> Dec 2022

- Two member project development team focused on the frontend build of a movie website.

Haley Fisher

- The user experience has three different features, the search bar for movies and shows, the add to list buttons for movie lists, and the movie night generator that will generate a random movie based on category.
- Full-stack application built with JavaScript, Node.js, Express, Sequelize, HTML, CSS, and Bootstrap.

Taylor Swift Trivia Website | <https://github.com/haleynrosi/tswift-trivia-react>

March 2023

- Solo project developed to allow users to play two different types of Taylor Swift based trivia, Lyric and Fact trivia.
- User experience allows for the user to choose their trivia game and view trivia questions that flip based on a visible timer until the list is done, and ends with an answer key for players.
- Full-stack application built with ReactJS, Hooks, Express, React Bootstrap, React Router.

TraderRecipes Website | <https://github.com/haleynrosi/capstone-project>

May 2023

- Two member project, developed to allow users to share and save recipes from Trader Joe ingredients.
- User experience allows for the ability to search recipes by ingredient item and recipe name for both breakfast, lunch, and dinner recipes. Has a login and account creation feature so users can save recipes and ingredients to a grocery list on their own dashboards. Has a submit recipe feature for users to contribute to the recipe database.
- Full-stack application built with ReactJS, Hooks, Express, React Bootstrap, React Router, Node.js, Express, AWS, Sequelize.
